MEKATRONİK

[www.nesga.com.tr](http://www.nesga.com.tr)

## ABOUT OUR COMPANY

Nesga Mekatronik was established in Bursa with 32 years of experience. It primarily operates in the fields of control fixtures, assembly lines, and 3D design

## OUR MISSION

The most important legacy we can leave to future generations is to make our existing world more livable. For this reason, the human phenomenon for a more conscious generation is the main mission of Nesga Mekatronik.

## OUR VISION

Nesga Mekatronik, with a vision to become a reference in the fields of control fixtures, assembly lines, PVD metallization processes, and automation software, is committed to providing high-quality services as a core principle.

# PRINCIPLES AND VALUES

To ensure continuity within social solidarity, to adopt a high quality approach in all services, to create cost awareness, to be transparent and to provide full customer satisfaction.

We prepare projects in line with your requests and provide solution-oriented service from the beginning to the end of the production process.

# OUR MACHINERY EQUIPMENT TRACK

- 1- 3Axis Cnc machining center 550x600x1000mm
- 2- 3Axis CNC machining center 550x600x1100mm
- 3- 3Axis CNC machining center 550x600x1200mm
- 4- Manual Milling 350x350x500 mm
- 5- Servo Threading Unit
- 6- Column Drill
- 7- Ø350x1200 mm Lathe

LINES**

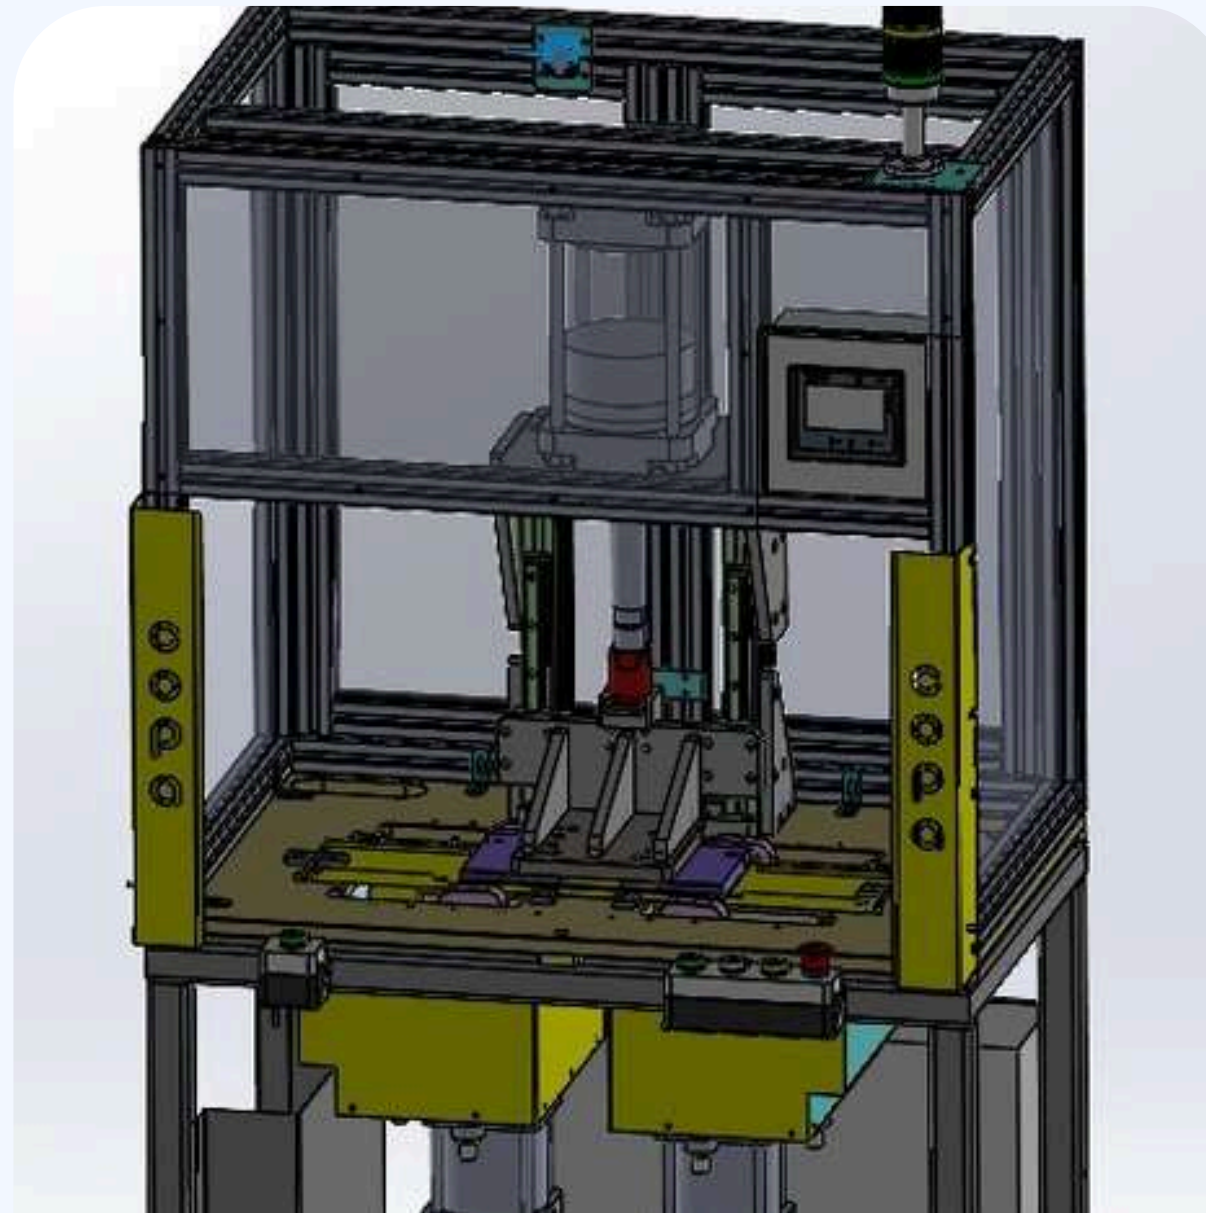

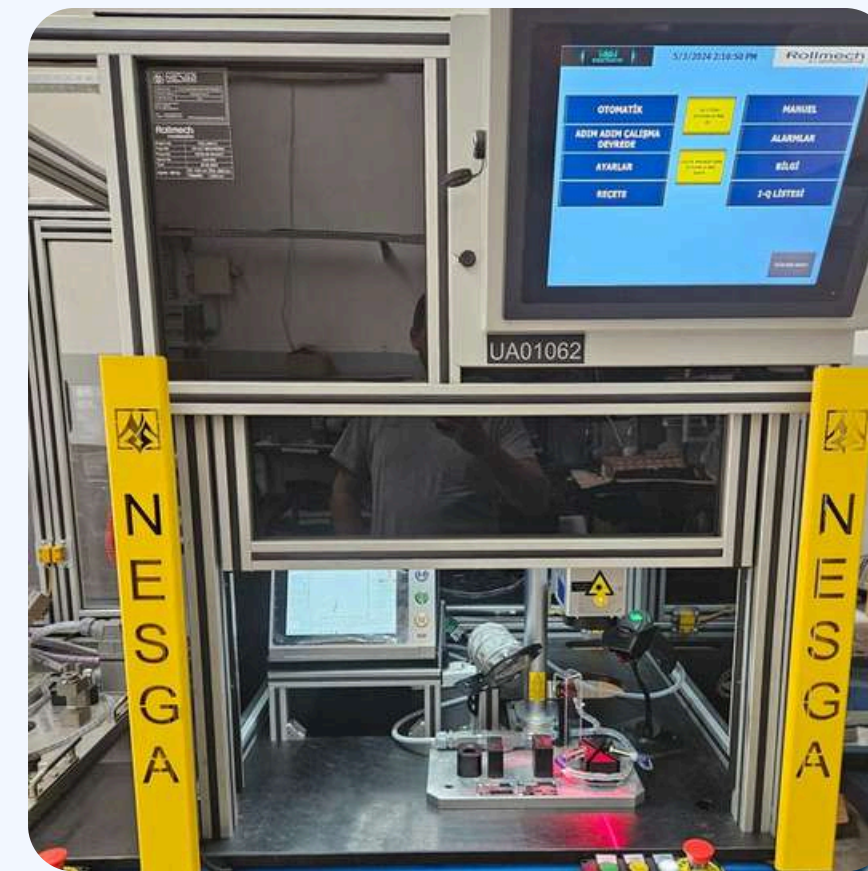

# HARD COATING EQUIPMENTS

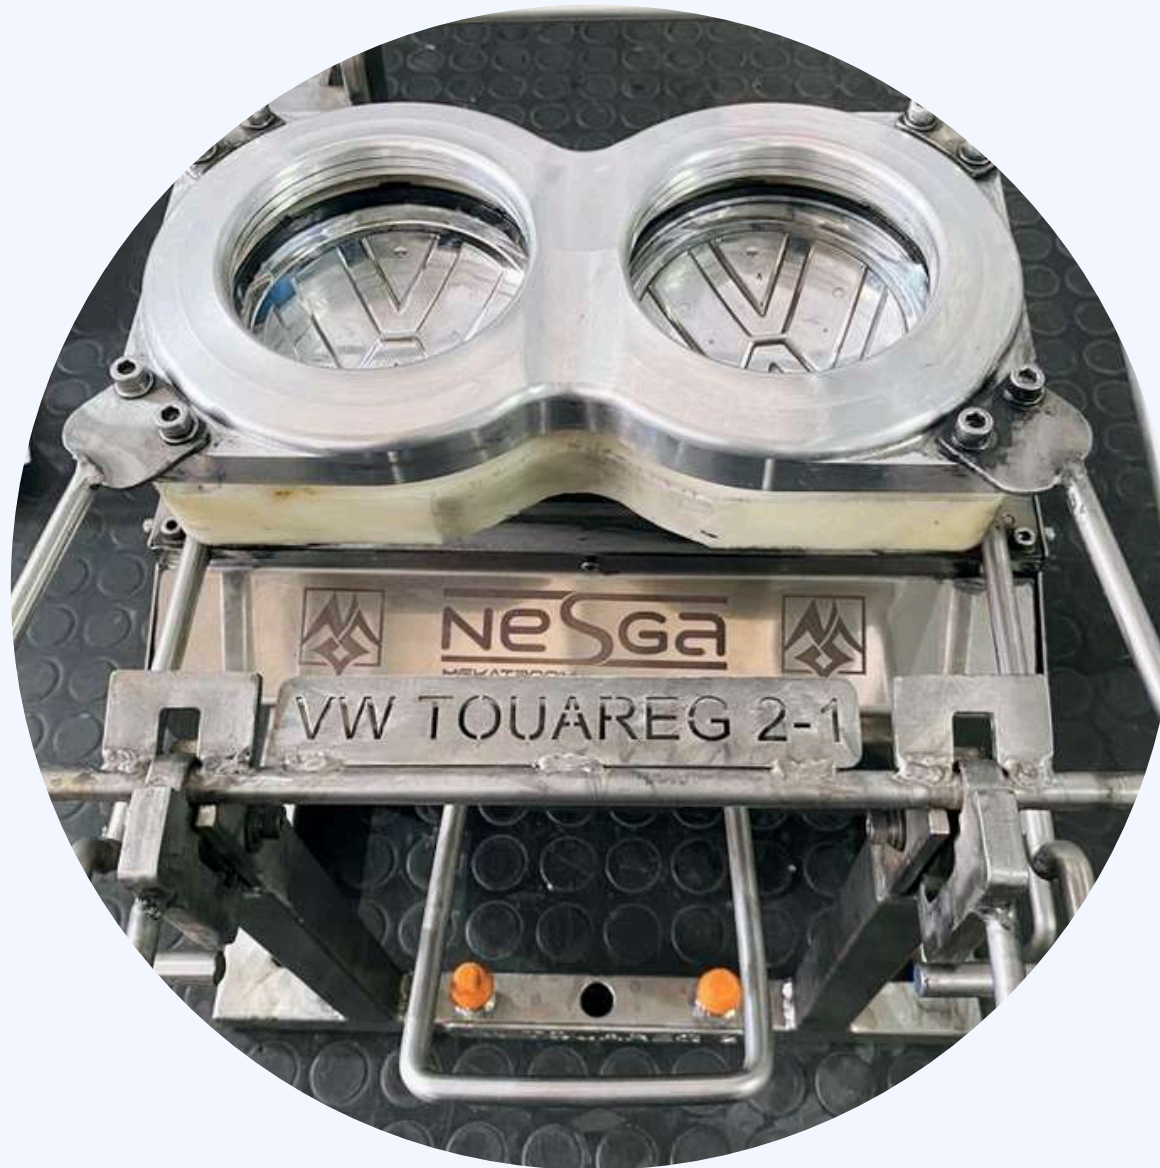

# TEST STATIONS

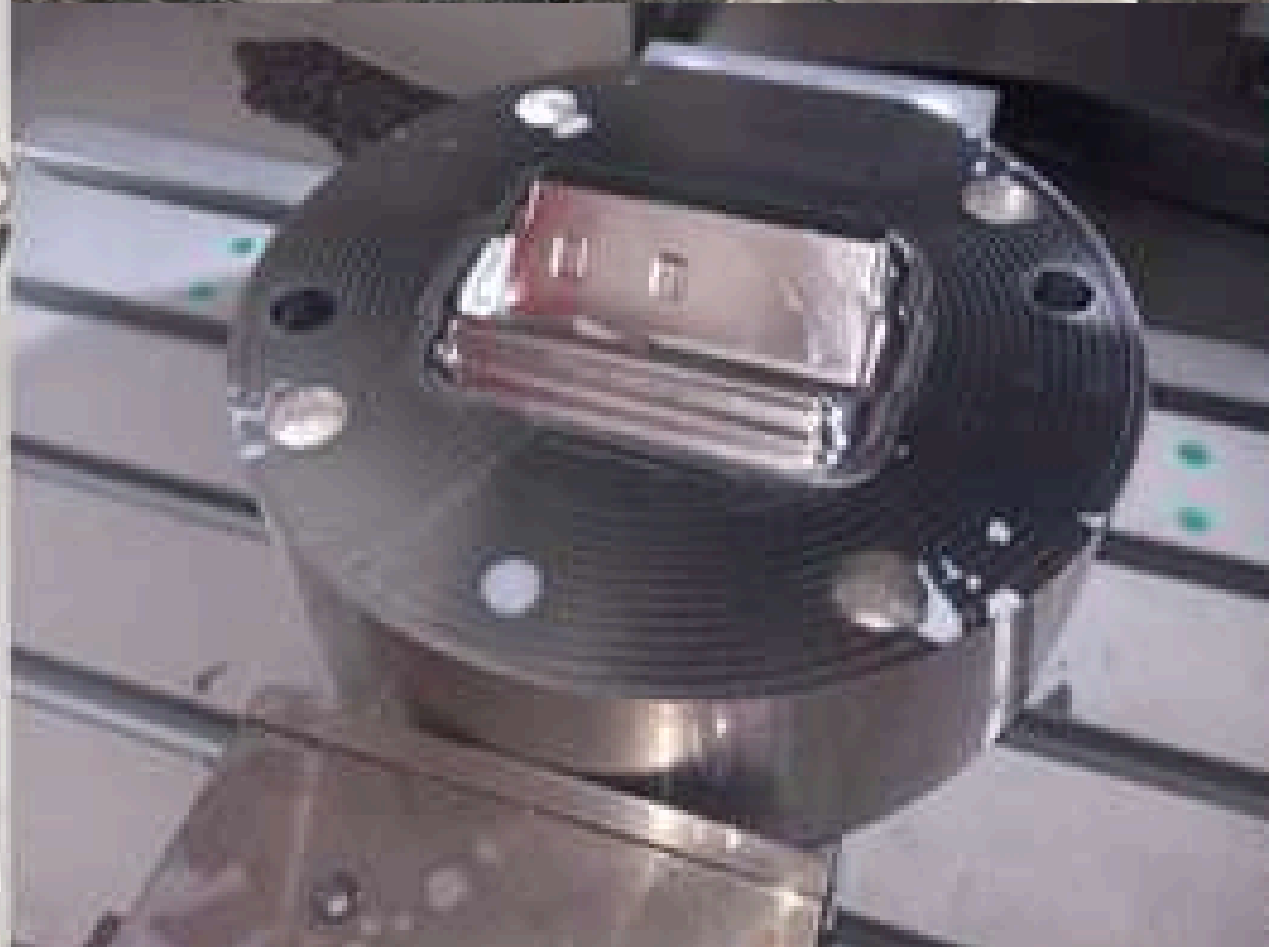

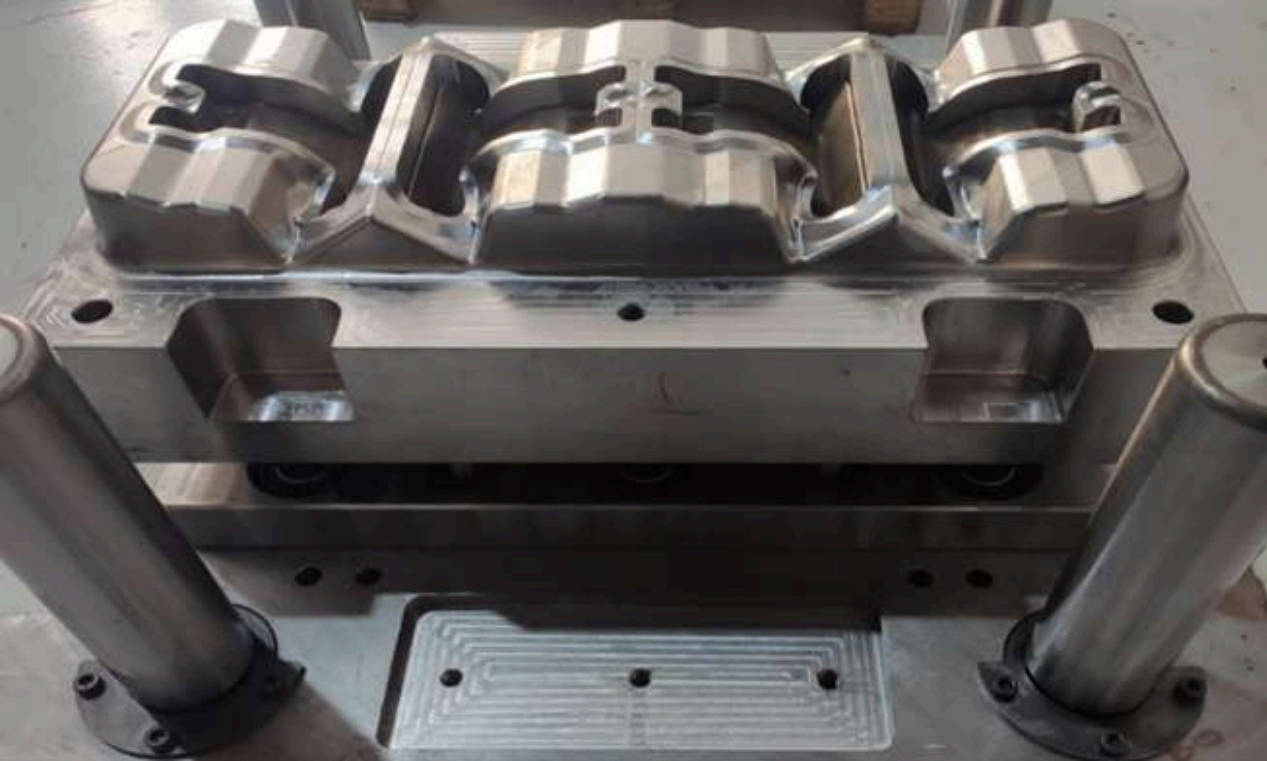

# PAINT FIXTURES

**Paint fixtures used in automated production lines are advanced systems designed to ensure fast production and high-quality coating. Robotic painting systems, commonly preferred in these processes, offer precise and uniform application, minimizing human error and increasing production speed.**

# Mold Manufacturing

Mounting Fixtures

**PVD Coating Technologies At Nesga Mekatronik, we specialize in the PVD coating process for reflective and decorative parts in the automotive industry. With our state-of-the-art equipment and innovative solutions, we enhance the aesthetics of your parts while providing long-lasting durability.**

Metallization

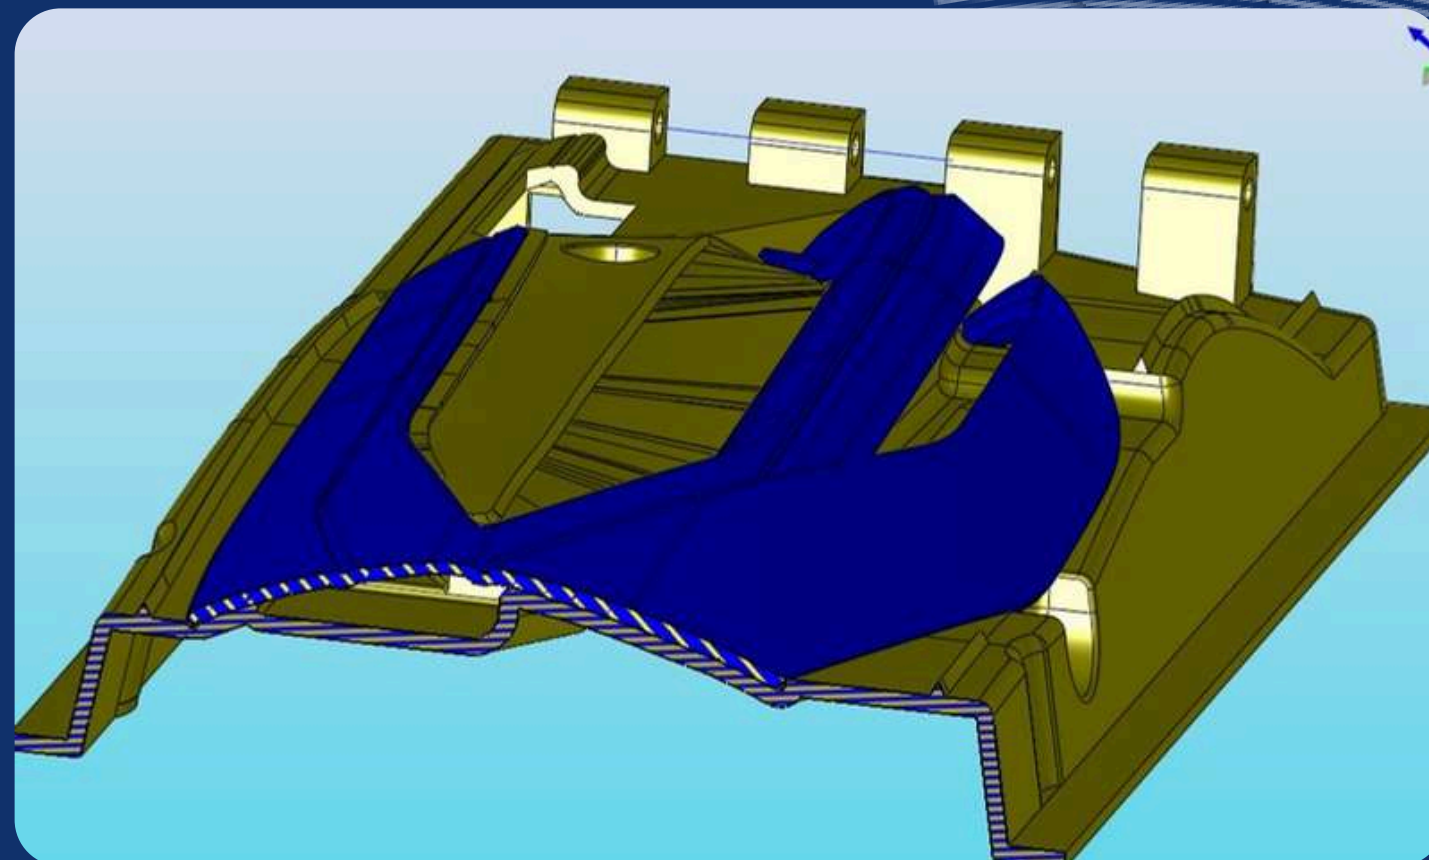

**Masking Systems: One of the most critical stages in the PVD coating process is masking, which prevents unwanted areas from being coated and ensures precise protection for the intended surfaces. Nesga Mekatronik's custom masking systems guarantee the most accurate and flawless coating results**

Metallization

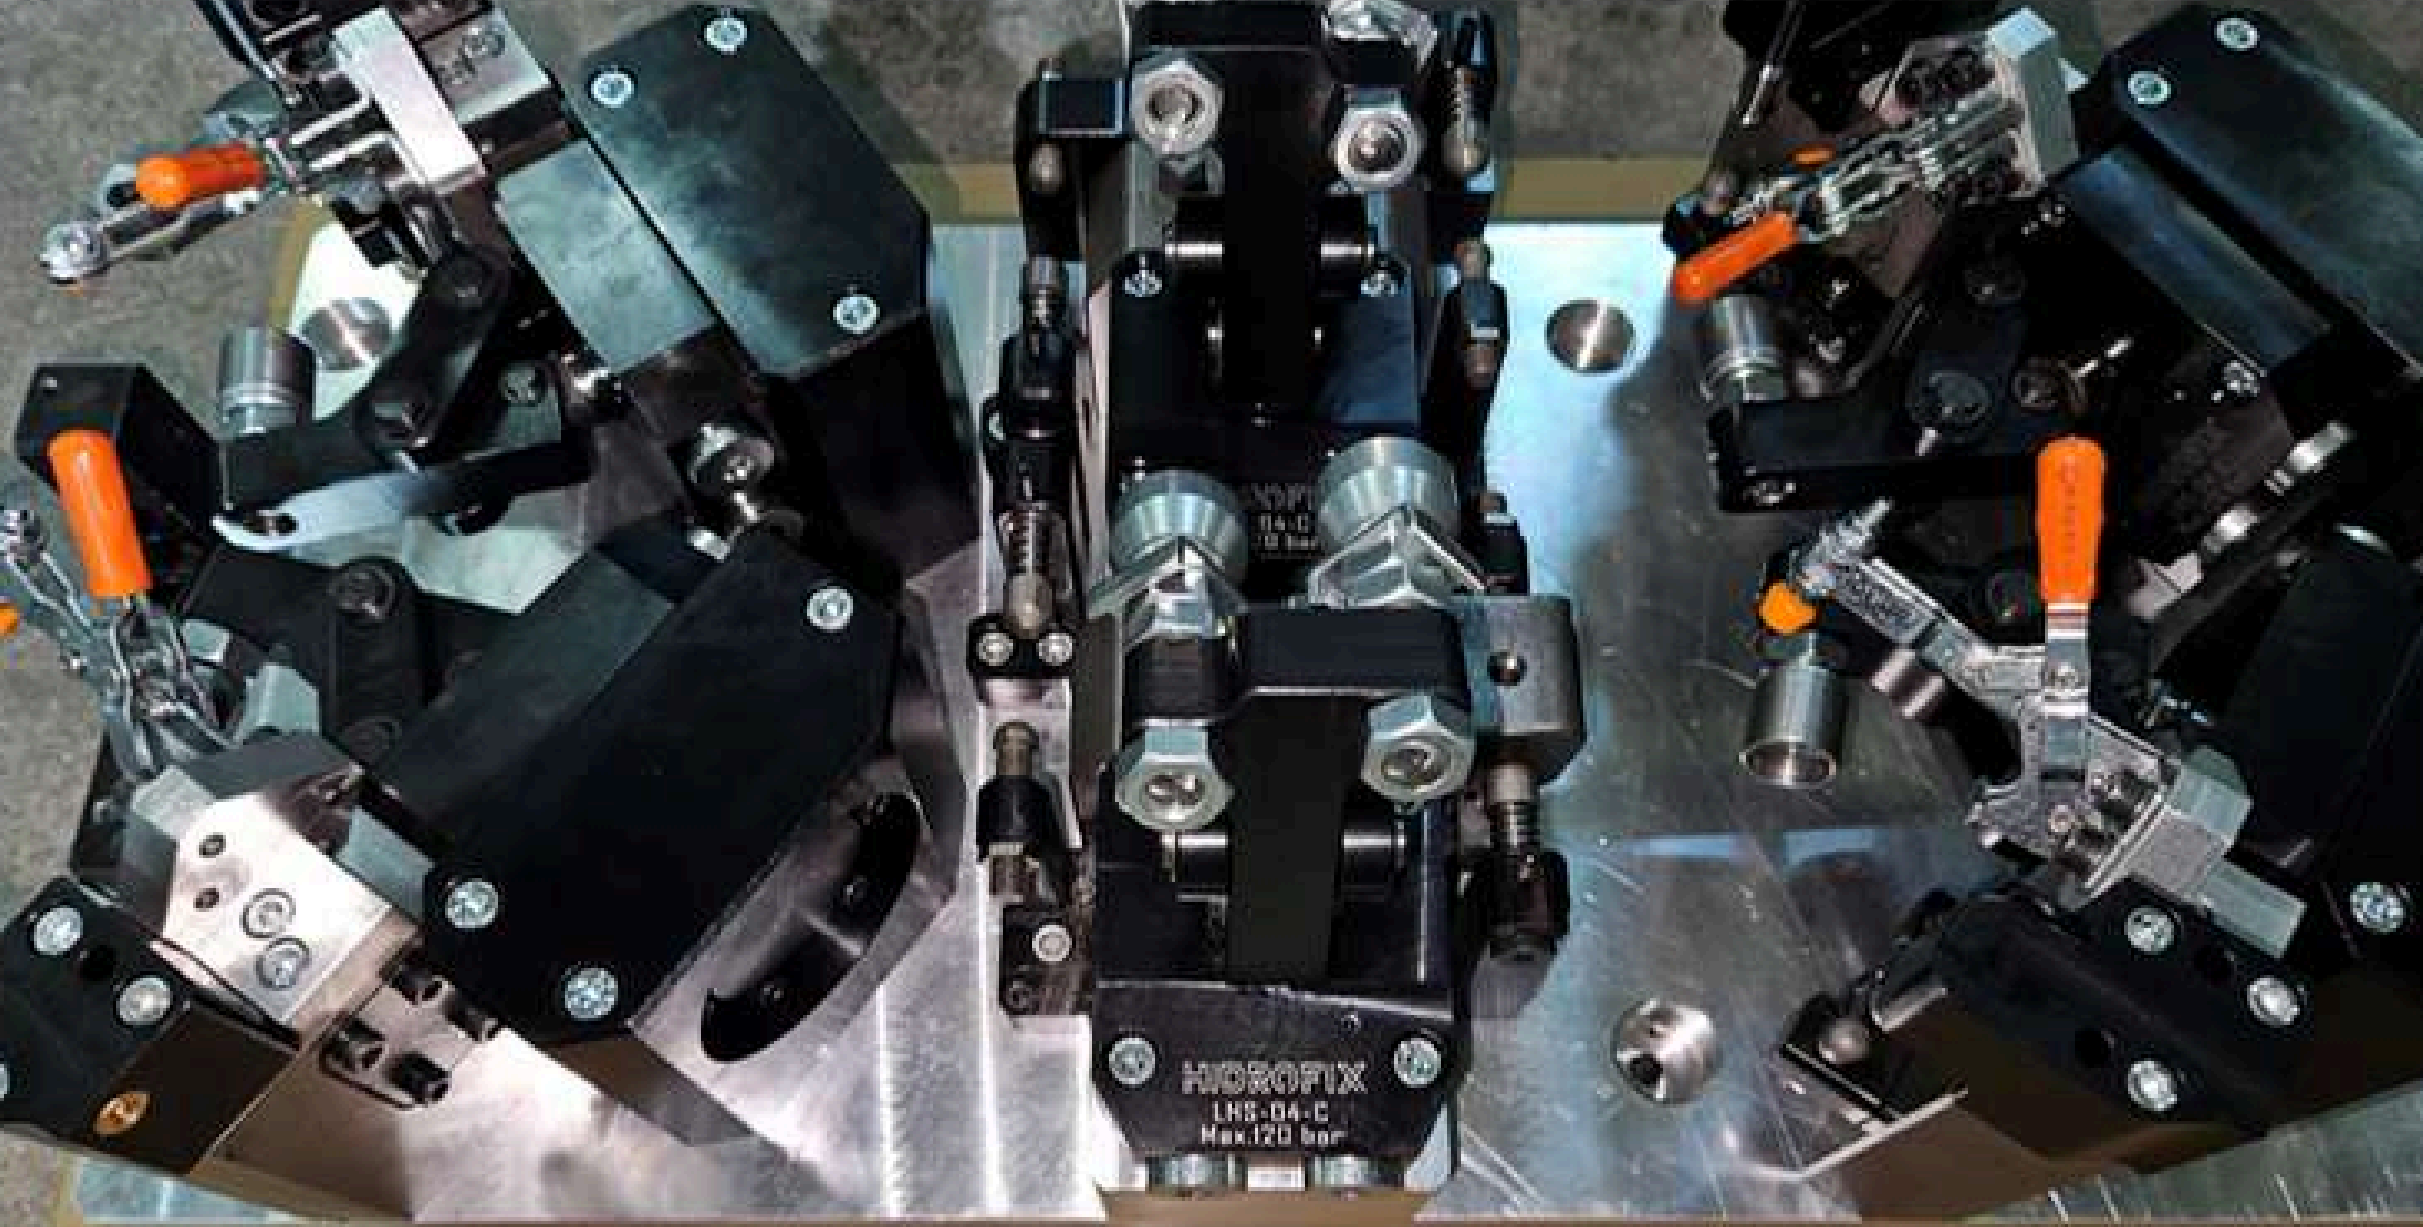

3D Print Service with  
MJF Technology

## MACHINING FIXTURES

Machining fixtures are processing apparatus equipped with hydraulic clamping systems designed for machining mass production parts on CNC milling machines.
